

Expanded Challenger–Charger Similarity Supplement for Previously Unresolved ADR Areas

2017 cross-variant/trim Mopar catalog screening

2026-07-31

Executive determination

All 13 previously unresolved ADR areas pass the broad cross-variant/trim similarity screen: 6 exact-direct, 2 exact-supporting and 5 functional-architecture passes.

Coverage: 112 route/category jobs attempted; 94 populated and 18 zero-row jobs. Zero-row jobs are coverage gaps, not successful populated routes. Recorded scraper errors: 0.

Regulatory limit: similarity is not ADR compliance. Catalog evidence does not prove installed configuration, markings, geometry, strength, field of view, calibration or test performance.

ADR result matrix

ADR	Subject	Challenger	Charger	Exact direct	Supporting only	Result
8/01	Safety Glazing Material	9	9	0	28	FUNCTIONAL-ARCHITECTURE PASS
11/00	Internal Sun Visors	9	15	0	1	FUNCTIONAL-ARCHITECTURE PASS
14/02	Rear Vision Mirrors	13	66	0	2	FUNCTIONAL-ARCHITECTURE PASS
18/03	Instrumentation	22	27	0	13	FUNCTIONAL-ARCHITECTURE PASS
21/00	Instrument Panel	22	31	3	10	EXACT-DIRECT PART MATCH PASS
25/02	Anti-Theft Lock	0	0	0	22	EXACT-SUPPORTING PART MATCH PASS
29/00	Side Door Strength	20	21	0	33	FUNCTIONAL-ARCHITECTURE PASS
34/02	Child Restraint Anchorages and Child Restraint Anchor Fittings	0	0	0	12	EXACT-SUPPORTING PART MATCH PASS
42/04	General Safety Requirements	85	164	40	15	EXACT-DIRECT PART MATCH PASS
69/00	Full Frontal Impact Occupant Protection	37	41	20	25	EXACT-DIRECT PART MATCH PASS
72/00	Dynamic Side Impact Occupant Protection	17	17	4	39	EXACT-DIRECT PART MATCH PASS
73/00	Offset Frontal Impact Occupant Protection	37	41	20	25	EXACT-DIRECT PART MATCH PASS
85/00	Pole Side Impact Performance	9	5	1	38	EXACT-DIRECT PART MATCH PASS

Controlled evidence statements

ADR	Selected exact parts	Controlled statement
8/01	[none — functional comparison]	Both models expose windscreen/door/quarter-glass catalog architecture; no exact glazing service number was established.
11/00	[none — functional comparison]	Both models expose visor assemblies and attachments; the sole exact category overlap is an audio microphone, not a visor.
14/02	[none — functional comparison]	Both models expose interior/exterior mirror systems; no exact mirror assembly or glass number was established.
18/03	[none — functional comparison]	Both models expose instrument-cluster and display architecture; no exact cluster service number was established.
21/00	1QF13DX9AP 68110649AA 68110650AA	Exact common glove-box, dampener and latch-striker components support shared instrument-panel architecture.
25/02	68404422AA	Exact common ignition-switch trim ring is supporting interface evidence only; it does not establish anti-theft lock, steering-lock or immobilizer identity.
29/00	1MZ84DX8AM 1MZ85KBXAM	Shared front-door handles plus corresponding door/aperture categories support functional body-side architecture; no exact intrusion beam or door-strength structure was established.
34/02	4628848AB 68110232AA 68110212AA 68110213AA 68110214AA	Exact common rear-seat latch/striker and seat-bracket parts support rear-seat architecture; no exact child-tether anchorage service number was identified.
42/04	1MZ84DX8AM 1MZ85KBXAM 6AD80DX9AA 6AD81DX9AA	Exact door-handle and steering-wheel components support common general-safety control architecture.
69/00	56054085AA 6ET081X9AB 6ET091X9AB 68140569AG 68259474AD 6AD80DX9AA	Exact acceleration sensor, front inner belts, steering columns and steering-wheel components support common frontal-restraint architecture.
72/00	56054085AA 6ET081X9AB 6ET091X9AB	Exact acceleration sensor and front inner belt components support common side-impact restraint architecture.
73/00	56054085AA 6ET081X9AB 6ET091X9AB 68140569AG 68259474AD	Exact sensor, belt and steering-column components support common offset-frontal restraint architecture.
85/00	56054085AA	Exact acceleration-sensor commonality supports side-impact sensing architecture; applicability is probably not mandatory for these 2017 vehicles and remains conditional.

Per-ADR traceability

ADR 8/01 — Safety Glazing Material

Assessment: FUNCTIONAL-ARCHITECTURE PASS

Selected evidence: [none]

Controlled statement: Both models expose windscreen/door/quarter-glass catalog architecture; no exact glazing service number was established.

Official ADR: <https://www.legislation.gov.au/F2005L03908/latest/text>

ADR 11/00 — Internal Sun Visors

Assessment: FUNCTIONAL-ARCHITECTURE PASS

Selected evidence: [none]

Controlled statement: Both models expose visor assemblies and attachments; the sole exact category overlap is an audio microphone, not a visor.

Official ADR: <https://www.legislation.gov.au/F2006L01785/latest/text>

ADR 14/02 — Rear Vision Mirrors

Assessment: FUNCTIONAL-ARCHITECTURE PASS

Selected evidence: [none]

Controlled statement: Both models expose interior/exterior mirror systems; no exact mirror assembly or glass number was established.

Official ADR: <https://www.legislation.gov.au/F2006L02663/latest/text>

ADR 18/03 — Instrumentation

Assessment: FUNCTIONAL-ARCHITECTURE PASS

Selected evidence: [none]

Controlled statement: Both models expose instrument-cluster and display architecture; no exact cluster service number was established.

Official ADR: <https://www.legislation.gov.au/F2006L01392/latest/text>

ADR 21/00 — Instrument Panel

Assessment: EXACT-DIRECT PART MATCH PASS

Selected evidence: 1QF13DX9AP — 2011 2021 Mopar Instrument Panel Glove Box | 68110649AA — Glove Box Door Dampener | 68110650AA — Glove Box Door Latch Striker

Controlled statement: Exact common glove-box, dampener and latch-striker components support shared instrument-panel architecture.

Official ADR: <https://www.legislation.gov.au/F2006L01786/latest/text>

ADR 25/02 — Anti-Theft Lock

Assessment: EXACT-SUPPORTING PART MATCH PASS

Selected evidence: 68404422AA — Ignition Switch Trim Ring

Controlled statement: Exact common ignition-switch trim ring is supporting interface evidence only; it does not establish anti-theft lock, steering-lock or immobilizer identity.

Official ADR: <https://www.legislation.gov.au/F2006L02664/latest/text>

ADR 29/00 — Side Door Strength

Assessment: FUNCTIONAL-ARCHITECTURE PASS

Selected evidence: 1MZ84DX8AM — 2013 2021 Mopar Front Door Exterior Handle Right | 1MZ85KBXAM — 2013 2018 Mopar Front Door Exterior Handle Left

Controlled statement: Shared front-door handles plus corresponding door/aperture categories support functional body-side architecture; no exact intrusion beam or door-strength structure was established.

Official ADR: <https://www.legislation.gov.au/F2006L01429/latest/text>

ADR 34/02 — Child Restraint Anchorages and Child Restraint Anchor Fittings

Assessment: EXACT-SUPPORTING PART MATCH PASS

Selected evidence: 4628848AB — Seat Back Latch Striker | 68110232AA — Seat Latch | 68110212AA — Seat Bracket | 68110213AA — Seat Bracket | 68110214AA — Seat Bracket

Controlled statement: Exact common rear-seat latch/striker and seat-bracket parts support rear-seat architecture; no exact child-tether anchorage service number was identified.

Official ADR: <https://www.legislation.gov.au/F2012L00703/latest/text>

ADR 42/04 — General Safety Requirements

Assessment: EXACT-DIRECT PART MATCH PASS

Selected evidence: 1MZ84DX8AM — 2013 2021 Mopar Front Door Exterior Handle Right | 1MZ85KBXAM — 2013 2018 Mopar Front Door Exterior Handle Left | 6AD80DX9AA — Steering Wheel | 6AD81DX9AA — Steering Wheel

Controlled statement: Exact door-handle and steering-wheel components support common general-safety control architecture.

Official ADR: <https://www.legislation.gov.au/F2005L03996/latest/text>

ADR 69/00 — Full Frontal Impact Occupant Protection

Assessment: EXACT-DIRECT PART MATCH PASS

Selected evidence: 56054085AA — Acceleration Sensor | 6ET081X9AB — Front Inner Seat Belt Right | 6ET091X9AB — Front Inner Seat Belt Left | 68140569AG — 2014 2021 Mopar Steering Column | 68259474AD — 2014 2021 Mopar Steering Column | 6AD80DX9AA — Steering Wheel

Controlled statement: Exact acceleration sensor, front inner belts, steering columns and steering-wheel components support common frontal-restraint architecture.

Official ADR: <https://www.legislation.gov.au/F2006L01455/latest/text>

ADR 72/00 — Dynamic Side Impact Occupant Protection

Assessment: EXACT-DIRECT PART MATCH PASS

Selected evidence: 56054085AA — Acceleration Sensor | 6ET081X9AB — Front Inner Seat Belt Right | 6ET091X9AB — Front Inner Seat Belt Left

Controlled statement: Exact acceleration sensor and front inner belt components support common side-impact restraint architecture.

Official ADR: <https://www.legislation.gov.au/F2005L03992/latest/text>

ADR 73/00 — Offset Frontal Impact Occupant Protection

Assessment: EXACT-DIRECT PART MATCH PASS

Selected evidence: 56054085AA — Acceleration Sensor | 6ET081X9AB — Front Inner Seat Belt Right | 6ET091X9AB — Front Inner Seat Belt Left | 68140569AG — 2014 2021 Mopar Steering Column | 68259474AD — 2014 2021 Mopar Steering Column

Controlled statement: Exact sensor, belt and steering-column components support common offset-frontal restraint architecture.

Official ADR: <https://www.legislation.gov.au/F2005L03990/latest/text>

ADR 85/00 — Pole Side Impact Performance

Assessment: EXACT-DIRECT PART MATCH PASS

Selected evidence: 56054085AA — Acceleration Sensor

Controlled statement: Exact acceleration-sensor commonality supports side-impact sensing architecture; applicability is probably not mandatory for these 2017 vehicles and remains conditional.

Official ADR: <https://www.legislation.gov.au/F2015L02109/latest/text>

Evidence needed for compliance-grade conclusions

- VIN/variant-specific build and fitted-component records.
- Manufacturer drawings, specifications and controlled declarations.
- Applicable ADR/UN/FMVSS test reports with demonstrated variant coverage.
- Physical labels, markings, dimensions and inspection evidence where the ADR requires them.
- Clause-level comparison for each accepted alternative-standard route and confirmation that the route is legally available.
